

# MBTA COMMUTER RAIL POSITIVE TRAIN CONTROL PROGRAM UPDATE

## ***Updated Advisory: Drill Work on Needham Commuter Rail Line on April 22***

***Work in Needham will occur 6AM-6PM***

MassDOT and the MBTA are undertaking federally mandated Positive Train Control (PTC) infrastructure installation which will increase the safety of commuter rail customers and would like to advise the community of upcoming daytime drill work within the right-of-way along the MBTA Needham Commuter Rail Line. Due to the equipment necessary to perform this work, high noise levels can be expected.

On **Sunday, April 22, 2018**, the PTC Systems Integrator Ansaldo STS USA, Inc. is scheduled to perform rock drilling activities during daytime work hours of between approximately 6AM – 6PM.

The work will take place along the Needham Line between Greendale Avenue and Great Plain Avenue in Needham (east of Hersey Station).

For further information regarding the PTC work schedule please visit the [MBTA PTC program website](#).

Thank you in advance for your cooperation. We appreciate your patience as the MBTA takes this important step in making the railways safer for customers with the implementation of the PTC program. Should you have any questions please feel free to contact the PTC program at 617-721-7506 or [PTCProgram@mbta.com](mailto:PTCProgram@mbta.com).
