

Article 32

Appropriate for Water System Distribution Improvements

- This project is part of a regular rehabilitation program including maintenance, repair, and replacement of aging pipes.
- Replacement of water pipes is prioritized, taking into consideration the condition of the pipe, water break history, and adequacy of water flow to fire hydrants.
- This funding will allow for the construction phase of the 16” water main replacement located in South Street between Charles River Street and Chestnut Street.
- The design phase of this project was funded in FY2022.

The Select Board unanimously recommends adoption of this article.
